## Vision

A transformative teaching service for quality education

## **Mission**

To professionalize the teaching service for quality education and development

## **Core Values**

Professionalism Customer Focus Integrity Team spirit Innovativeness

#### **FOREWORD**

The Teachers Service Commission Strategic Plan (2019-2023) is a deliberate effort by the Commission to transform the teaching service for quality education in line with its vision and mission statements. The broad objective is to align the Commission's reform agenda to the national priorities. The Strategic Plan is thus aimed at providing the basis for planning, resource mobilization and allocation for the effective and efficient execution of the Commission's mandate.

This Plan is the outcome of a number of processes that included an in-depth analysis of the previous Strategic Plan (2015-2019), National Policy Frameworks, Sector Reports and Recommendations from the Customer Satisfaction Survey conducted during the 2016/17 Financial Year. The process involved a series of consultative meetings with various stakeholders with a view to building consensus on priorities and appropriate strategies for implementation of the Plan. The consultations culminated in the stakeholder forum held in March 2019 at the Kenya School of Government, Nairobi, when stakeholders validated priorities proposed in the plan.

Through this Strategic Plan, a clear road map on transforming the teaching service and protection of learners for the next five years has been outlined. Specifically, the plan will provide for continuity and deliveries of services within the 3 strategic pillars outlined in the 2015- 2019 period, address emerging issues and provide a basis for planning and budgeting under the Medium Term Expenditure Framework (MTEF).

I wish to thank the National Government for the continued support given at both the national policy level and provision of resources. I trust that stakeholders and development partners will reinforce the government support in ensuring that this strategic plan is successfully implemented.

DR. LYDIA NZOMO, CBS CHAIRPERSON

#### PREFACE

The National Government has initiated major reforms in the education sector aimed at realizing the aspirations of the Constitution and the Kenya Vision 2030 Strategy. The reforms that include a shift towards a Competency Based Education System underpin the national development priorities. In particular, the "Big Four" initiatives of *food security; universal health care; affordable housing and manufacturing* must be driven and delivered by a skilled human resource. These development goals, among other emerging strategic interventions, have informed the TSC Strategic Plan for the period 2019-2023.

The TSC Strategic Plan is aimed at providing the basis for resource allocation in the execution of the Commission's mandate. Programme priorities and targets will be delivered within three Strategic Focus Areas namely: Teacher Competence Conduct and Performance Management; Reforms and Innovations in Provision of Teaching Services and Service Delivery Re-engineering.

In order to guarantee continuity and flexibility in the implementation of the activities set out in this Plan, the Commission will develop an annual review process. The review process is critical as a means of taking stock of milestones achieved and any challenges experienced in the course of Plan implementation. The Commission is committed to instituting appropriate interventions and mobilization of the necessary resources to facilitate full implementation of this Strategic Plan.

Finally, I wish to acknowledge all stakeholders who participated directly or indirectly towards the successful preparation of the 2019- 2023 Strategic Plan. Specifically, the participation, input and support from various Departments and Agencies of the National Government, Teacher Professional Associations and Unions, members of the Commission and the secretariat staff contributed significantly to the timely production of this Plan. I also wish to convey my sincere appreciation to the State Department for Planning and the Eastern and Southern Africa Management Institute (ESAMI) for the provision of consultancy services and technical support during the plan development partners and all stakeholders to ensure the successful implementation of this Strategic Plan.

## DR NANCY NJERI MACHARIA, CBS SECRETARY/CHIEF EXECUTIVE OFFICER

## **DEFINITION OF TERMS**

Baseline:	An analysis describing the initial state of an indicator before the start of a project/programme against which progress can be assessed or comparisons made	
Enrolment:	Total number of learners registered in a class or school at any given time	
<b>Medium term expenditure framework:</b> A three expenditure plan setting out the m term expenditure priorities		
Outcome:	An end result of a process or an intervention in relation to the objectives	
Indicator:	A measurement that evaluates the success of the Commission's activities, projects or programs	
Output:	Immediate results obtained from activities outlined in the Strategic Plan	
PESTEL Analysis:	A framework or tool used to analyse and monitor the external factors that may have an impact on the Commission during the implementation of the Strategic Plan	
Private School:	An educational institution maintained and administered by private individuals or groups	
Public School:	A learning institution registered as such, under the Basic Education Act and/or supported wholly or partially by the Government	
Pupil-Teacher Ratio:	The proportion of the number of authorized positions for teachers at a certain level in a given year to the enrolment at the same level in the same year	
Standard Assessments:	Evaluation of the performance of teachers in the teaching- learning process with respect to set standards and provision of professional advice for improvement.	
SWOT Analysis:	A study undertaken by an organization to identify its internal strengths and weaknesses, external opportunities and threats

#### **EXECUTIVE SUMMARY**

The Teachers Service Commission is established as an independent Commission under Article 237(1) of the Constitution. By the end of June, 2018, the Commission was responsible for a working force of 317,069 teachers deployed to 30,892 public educational institutions in the country. These include 217,291 teachers serving in public primary and 99,778 in Post-Primary institutions. The learner population served by these teachers stood at 8,071,662 and 2,761,769 for primary and Post-Primary institutions respectively.

The Government recognizes investment in quality education as a critical factor in the supply of skilled manpower to support development across all sectors of the economy. The national development agenda has given priority to improving four key sectors popularly known as "the Big Four Agenda" which include food security, universal health care, affordable housing and manufacturing, which will greatly depend on skilled manpower as primary drivers. Thus investment in quality education will underpin these initiatives.

It is noteworthy that the Commission plays a significant role in the implementation of the national curriculum that equips learners with desired values, attitudes, knowledge, skills and competencies, particularly in technology, innovation and entrepreneurship. The manner in which the country manages teachers largely determines the quality of education for its citizens and their contribution to national development. Accordingly, the Commission must position itself strategically in formulating a framework that addresses the peculiar needs of the teaching profession not only at the national but also at global levels.

The TSC Strategic Plan for the period 2015-2019 was based on three broad areas of focus namely; Teacher Competence, Conduct and Performance Management; Reforms and Innovations in Provision of Teaching Services and Service Delivery Re-engineering and Decentralization. Remarkable achievements, particularly on the Teacher Competence Strategic Pillar were realized during this period. Some of the milestones include the roll-out of the Teacher Professional Development (TPD) Framework; Teacher Performance Appraisal and Development (TPAD) instruments and the review of the Code of Regulations for Teachers (CORT) and Code of Conduct and Ethics (COCE). In addition, various policies and administrative guidelines were reviewed during the 2015-19 period. These initiatives have led to improved teacher-learner contact time, efficiency in curriculum delivery and enhanced professionalism in the teaching service, among other envisaged outcomes.

The 2019-2023 Strategic Plan will reinforce the gains made over the last 5 years and guarantee improved learning outcomes and safety of learners. During the next five years,

the Commission will maintain focus on the three key result areas namely, Teacher Competence, Conduct and Performance Management, Reforms and Innovations in provision of teaching Service and Service Delivery Re-engineering. However, strategic objectives, strategies and targets have been redefined to address emerging national priorities that include the shift towards a Competency Based Curriculum and realization of 100 percent transition from primary to secondary school.

The Strategic Plan has provided for an effective implementation and coordination framework in terms of human and financial resource allocation. The overall budget required for the successful delivery of planned targets is estimated at Kshs.114.5 billion. This includes the cost of recruiting 95,000 additional teachers and 20,000 interns per annum in the next five years. The estimated cost for this critical investment is Kshs.82.4 billion. The bulk of this funding is expected from the National Government. The Commission will however continue engaging the various development partners in resource mobilization and budget support. Additionally, the Commission will identify areas of collaboration under the Public Private Partnership (PPP) initiative.

The Commission has rolled out an Institutional Risk Management Framework and Policy to mitigate the strategic risks that may impede efficient implementation of the plan. A description of the identified risks, their categorization and mitigating action is included in this plan. Further, the Commission has established structures for monitoring and evaluation of programmes outlined in this plan in order to track progress, achievements and challenges in the course of implementation.

The Monitoring and Evaluation of the plan will be done at various levels. The Reports and feedback from the process will inform corrective measures and realignment of resources. A mid-term review and end of plan evaluation are also envisaged during the Plan implement

#### **CHAPTER ONE: INTRODUCTION**

#### **1.0 Overview**

This chapter provides an introduction to the establishment and mandate of the Teachers Service Commission (TSC). The chapter also outlines the global, regional and national development perspectives relevant to the mandate of the Commission. The role of the Commission in supporting the national development agenda is also amplified in this chapter.

### 1.1 Background

The Teachers Service Commission (TSC) was first established by an Act of Parliament in 1967. It operated as a statutory Semi-Autonomous Government Agency (SAGA) under the Ministry of Education until 2010. Article 237 of the Constitution (2010) established the Commission as an independent entity with a redefined mandate to regulate the teaching profession and manage teachers under the employment of government.

As at June, 2018, the Commission was responsible for a working force of 317,069 teachers deployed to 30,892 public educational institutions in the country. These include 217,291 teachers serving in 22,263 public primary and 99,778 in 8,629 Post-Primary institutions. The learner population served by these teachers stood at 8,071,662 in primary and 2,761,769 in Post-Primary institutions.

### **1.2** Mandate of the Teachers Service Commission

The Commission, under Article 237 of the Constitution is mandated to; to register trained teachers, recruit and employ teachers, assign teachers employed by the Commission, exercise disciplinary control over registered teachers, terminate employment of teachers, review the standards of education and training of persons entering the teaching service, review demand for and supply of teachers and advise the national government on matters relating to the teaching profession.

In addition, the TSC Act clarifies the legal framework and the autonomy under which it operates. Specifically, the Act empowers the Commission to formulate policies to regulate the teaching profession and guide teacher management functions. Broadly, this entails ensuring compliance with teaching standards prescribed from time to time, facilitating career progression and professional development of teachers and monitoring their conduct and performance in the course of curriculum implementation.

## **1.3 Global, Regional and National Development perspective on the Teacher Management Sub-Sector**

- 1.3.1 Kenya is committed to implementation of *the 2030 Agenda for Sustainable Development*. Specifically, SDG number 4 commits member states to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. One of the means of implementing this SDG is to ensure that by the year 2030 there will be a substantial increase in the supply of qualified teachers, including through international cooperation for teacher training in developing countries. The SDG number 4 goals are to be realized within the framework of a revitalized Global Partnership for Sustainable Development, supported by tangible policies and actions by member states.
- 1.3.2 In addition, the Commonwealth Teacher Recruitment Protocol adopted in 2004, aims to balance the rights of teachers to migrate internationally against the need to protect the integrity of national education systems. The Protocol also seeks to safeguard the rights of recruited teachers and the conditions relating to their service in the recruiting country.
- 1.3.3 At the regional level, *the African Union Commission (AUC) Agenda 2063* on inclusive growth and sustainable development recognizes education as the main vehicle for inter-generational social mobility. It emphasizes quality education that is free at the basic level (primary and secondary) and further emphasizes on the significance of investing in science, technology and innovation. In addition, there are concerted efforts under *the East African Community (EAC) Common Market Protocol*, to harmonize education standards and share good professional practices across the East African Community member states.
  - 1.3.4 From a national perspective, the Vision 2030 Strategy identifies availability of skilled manpower as a critical component to the realization of the vision. The recently launched National Development Agenda also known as ``the Big Four'' underpins the need for a knowledge based economy that supports the delivery of service along the four pillars of food security, universal health care, affordable housing and manufacturing. Investment in quality education therefore serves as an integral component to the delivery of skilled manpower required across the identified sectors.

## **1.4** The role of TSC in delivering the National Development Agenda and related International Conventions

- 1.4.1 The government recognizes investment in quality education as critical in the supply of skilled manpower to support development across all sectors of the economy. The manner in which the country manages and regulates its teaching service determines the quality of its human resource and contribution to national development. Accordingly, the Teachers Service Commission, as a regulator and manager of teaching services, plays a crucial role in shaping the requisite skilled manpower for the country's economic and social development. The Commission must therefore position itself strategically to leverage on opportunities presented at the national and global levels.
- 1.4.2 In support of the AUC Agenda 2063, Kenya has so far implemented part of the aspirations through the adoption of free primary, free day secondary education and the 100% transition from the primary school to the secondary school initiative. In addition, TSC envisages increasing the number of qualified teachers by at least 30% with focus on Science Technology Engineering and Mathematics (STEM).
- 1.4.3 Through *the East African Community (EAC) Common Market Protocol*, an opportunity to exploit the abundant supply of trained teachers in the country to export labor to the EAC countries and beyond presents itself to the Commission. This will not only create employment opportunities to the Kenyan youth but will also benefit the recipient countries with skilled teaching services.
- 1.4.4 Kenya is also a signatory to the United Nations Conventions on Sustainable Development Goals (SDGs). This places an obligation on the TSC through its Strategic Plan to maintain focus in delivery of SDG 4, other SDG goals and linking them with existing national education priorities.

#### **CHAPTER TWO: SITUATION ANALYSIS**

#### 2.0 Overview

This chapter broadly describes the current status and the environment in which the 2019-2023 TSC Strategic Plan is contextualized. The chapter presents an overview of the performance of Commission over the last five years, challenges experienced and the lessons learnt. Cursory look at both internal and external factors that may influence the implementation of the Plan also inform the analysis. The review has further identified the main stakeholders and their varied interests and expectations from the Commission.

### 2.1 Review of the 2015-2019 Strategic Plan implementation

The TSC Strategic Plan for the period 2015-2019 was based on three broad areas of focus namely: Teacher Competence, conduct and Performance management; Reforms and innovations in provision of teaching Services; and Service Delivery Re-engineering and Decentralization. Remarkable achievements were realized, especially on the Teacher Competence Strategic Pillar.

### 2.1.1 KEY ACHIEVEMENTS

# 2.1.1.1 STRATEGIC PILLAR 1: Teacher competence, conduct and performance management:

This pillar sought to ensure quality of the teacher at entry, effective induction and inservice programmes, supervision and reliable appraisal systems at all levels. The following milestones were realized on the two Strategic Objectives under this pillar:

## 2.1.1.1.1 Strategic objective 1: To improve teaching standards in public educational institutions

- **i.** A policy framework on Teacher Professional Development (TPD) was developed and rolled out.
- ii. Two modules were developed and currently being implemented. These include: *Introductory Modules* and *Module Level 1* (for teachers and instructional leaders). Through the modules, teachers are expected to continuously build their capacity in skills, knowledge, attitudes and values to improve learning outcomes.
- iii. The Teacher Performance Appraisal and Development (TPAD) and Performance Contracting were introduced and implemented in all public basic education institutions. The tools are designed to improve teacher-leaner contact hours and accountability in these institutions.

## 2.1.1.1.2 Strategic objective 2: To enhance integrity and professionalism in the teaching service

- i. Key policy instruments including Code of Regulations for Teachers (2015), Code of Conduct and Ethics (2015) were reviewed.
- ii. The TSC Act, CORT and COCE were distributed and disseminated to 30,000 basic learning institutions across the country.
- iii. Capacity building was done for school administrators and staff at the county level in management and prevention of professional misconduct among teachers.

# 2.1.1.2 STRATEGIC PILLAR 2: Reforms and innovations in provision of teaching Services:

The aim of this pillar was to optimize utilization of the teaching resource and also improve efficiency and quality of the teaching service. The pillar also focused on integrating ICT in teaching, identifying other approaches in curriculum delivery and addressing disparities in teacher distribution at all levels. The following were the achievements on the two Strategic Objectives under this pillar:

# 2.1.1.2.1 Strategic objective 3: To optimize utilization of the teaching resource.

- i. The Teacher Management Information System (TMIS) was enhanced through design and rolling out an online data capture system.
- ii. A total of 28,843 teachers were recruited as indicated in Table 2.1

Teachers recruited from 2014-2018				
	INSTITUTIONS	INSTITUTIONS		
YEAR	PRIMARY	POST-PRIMARY	TOTAL	
2014	2,479	2,521	5,000	
2015	2,481	2,662	5,143	
2016	1,225	3775	5,000	
2017	2,205	2,795	5,000	
2018	-	8700*	8700*	
Total	8,390	20,453	28,843	

## Table 2.1: Trends in recruitment of teachers 2014-2018

Source: TSC Data: 2018

**Note:** To facilitate the 100% transition from primary to secondary schools, the Commission recruited 8,700 post primary school teachers. This was a major shift in government policy in teacher recruitment which necessitated reallocation of resources in favour of secondary school teachers.

#### 2.1.1.2.2 Strategic objective 4: To integrate ICT in curriculum delivery

- i. Approximately 66 ICT champions at the primary school level were trained through the Digital Learning Programme (DLP).
- ii. A total of 90,000 teachers were trained on ICT integration and curriculum implementation under the same Programme (DLP).

## 2.1.1.3 STRATEGIC PILLAR 3: Service Delivery Re-engineering and Decentralization:

The pillar was aimed at facilitating decentralization of services to the counties and sub counties. It sought to strengthen the integrated support systems and structures for more efficient operations with focus on responsiveness to customer needs. The following the milestones realized on the Strategic Objective under this pillar:

## 2.1.1.3.1 Strategic objective 5: To improve efficiency and effectiveness in service delivery at the Commission

- i. TSC on-line services including, the on-line teacher registration were upgraded. As a result, all qualified teachers are registered through the online platform. In addition, the turn-around time in the registration process has reduced from an average of three months to less than one month. Mechanisms have also been established to update the register on real time basis.
- ii. Key TSC functions were decentralized. These include the management of discipline, recruitment, transfer and promotion of teachers. Accordingly, the rate of determination of discipline cases has improved considerably. The turn-around time has reduced from an average of six to three months from inception to determination. In addition, efficiency in teacher recruitment and transfer processes at the County and Sub-county level has improved significantly.
- iii. An Institutional Risk Management Framework and Policy was developed and rolled out to provide mitigation measures against risks that may impact the Commission's mandate and functions.
- iv. A workload analysis and review of the TSC Organizational Structure was undertaken in an effort to optimize the capacity of human resource.
- v. Other achievements in the management of human resource include:
  - a) Promotion of 11,177 teachers between Job Groups K and R.

- b) Upgrading of 35,887 teachers through the common establishment process.
- c) Implementation of the 2017-2021 Collective Bargaining Agreements (CBA) with Teachers' Unions pursuant to Job Evaluation findings.
- d) Development of the Policy on Identification and Appointment on Institutional Administrators together with Career Progression Guidelines for the teaching service to streamline career growth and succession management.

## 2.1.2 CHALLENGES EXPERIENCED IN THE IMPLEMENTATION OF THE 2015-2019 STRATEGIC PLAN

In the course of implementation of Strategic Plan 2015-2019, the Commission faced the following challenges in the execution of its mandate:

## 2.1.2.1 Review of teaching standards

- i. Lack of a harmonized qualification framework to determine entry standards for teacher training institutions.
- ii. Insufficient structures and co-ordination framework for teacher in-service and professional development programmes.

## 2.1.2.2 Teacher shortage

By 30<sup>th</sup> June, 2018, the Commission estimated teacher shortage of 96,345 with 38,054 at Primary and 58,291 at Post-Primary school level respectively. This shortage is attributed to rapid growth in school enrolment and various initiatives in the education sector that have necessitated the establishment of new and expansion of existing schools. These initiatives include the Government policy of 100% learner transition from primary to secondary. By 2023, the teacher shortage is projected at 61,671 for secondary and 34,941 for primary schools as illustrated in Table 2.2.

Table 2.2: Net projections on teacher shortages -2019-2023 using February 2018as a base year

Projections in Teacher Shortage (2019-2023)					
Year	Primary	Post-Primary	TOTAL		
2019	37,410	61,671	99,081		
2020	36,777	61,671	98,448		
2021	36,155	61,671	97,826		
2022	35,543	61,671	97,214		

2023	34,941	61,671	96,612
------	--------	--------	--------

#### Source: TSC Data: 2018

The projections indicate either a reducing or a constant teacher demand for the secondary school and primary school sub sectors, respectively. At the primary school level, the declining demand is attributable to continuous teacher recruitment focusing on this subsector over the years. At the secondary school level, the constant projected shortage between 2019 and 2023 is premised on the assumption that the government will sustain provision of 12, 626 teachers per year at this level. The full implementation of Competency Based Curriculum is however expected to impact the teacher demand significantly.

### 2.1.2.3 Teacher distribution and utilization

Despite several interventions to achieve teacher balance and rationalization, there are still disparities in the distribution and utilization of teachers across the country. The imbalance is as a result of a combination of factors that include; insecurity in certain regions; preferences by teachers for urban and high potential areas; unwillingness of teachers to be separated from their families; medical issues; and in a few instances, establishment of unviable schools. In addition, the Commission has experienced a high turnover of teachers in specific subject areas such as ICT that are in high demand even in the private sector. The imbalance in teacher distribution has not only undermined the principle of equity but also the delivery of education curricula.

## 2.1.2.4 Teacher discipline

Despite several interventions in exercising effective disciplinary control over teachers, the Commission has recorded an increase in teacher indiscipline. This may be attributed to; non-adherence to the law specifically CORT and COCE by teachers, inadequate mastery of discipline procedures and processes by the TSC agents and lack of a structured induction, coaching and mentoring programme for teachers.

### 2.1.2.5 Inadequate budgetary provision

Over the last five years, the Government has been implementing financial austerity measures across Ministries, Departments and Agencies (MDAs), targeting expenditures considered discretionary and non-productive. As a result, the Commission has been subjected to significant budget cuts, which has impacted on the implementation of several reform initiatives and strategic plan priorities.

## 2.1.3 LESSONS LEARNT DURING THE IMPLEMENTATION OF THE 2015-2019 STRATEGIC PLAN

The following were the lessons learnt during the implementation of the 2015-2019 Strategic Plan.

#### 2.1.3.1 Review of Teaching Standards

The Commission has so far developed a framework that incorporates global approaches in teacher professional development that seeks to improve and sustain teaching standards. In order to ensure effectiveness, this framework and related instruments will require substantive investment and buy-in by all stakeholders. Presently, the Commission lacks appropriate structures to effectively regulate the teaching profession. In addition, the introduction of the Teacher Performance and Appraisal Development (TPAD) for teachers and Performance Contracting has significantly enhanced supervision and implementation of curricular in public learning institutions. These instruments are expected to contribute to improved learning outcomes and general performance and motivation of teachers.

The Strategic Plan (2019-2023) must therefore design strategies that address establishment of a comprehensive in-service programme for teachers in public schools, harmonization of entry requirements for teacher training and structures for the effective regulation of the teaching service applicable to all registered teachers in both public and private sectors.

#### 2.1.3.2 Teacher Shortage

As a measure to cope with teacher shortages, various Boards of Management for institutions have engaged approximately 80,000 teachers in public schools some of whom may not be qualified. This has compromised the standards of education and learner achievement and also undermined the Government's commitment to free/affordable basic education.

The Strategic Plan (2019-2023) should therefore provide for strategies that will optimally utilize the available teaching resource. This may include the use of alternative modes of curriculum delivery. In addition, the Commission will be required to consider hiring of teachers on part-time basis and formalize teacher internship programme as some of the measures to bridge the gap.

### 2.1.3.3 Teacher distribution and utilization

While access to education at the primary school level has considerably improved, the increase in school enrolment has had an adverse effect on teaching and learning. This is

manifested in overcrowded classrooms hence inappropriate pupil-teacher ratio in certain regions. There is therefore need to establish a national standard for teacher distribution and utilization that will address appropriate teaching load under the Competence Based Curriculum.

## 2.1.3.4 Teacher Discipline

Contemporary Human Resource Management practices prescribe preventive rather than corrective approaches in addressing employee discipline. Appropriate strategies will be given priority in the Strategic Plan for 2019-2023. They include; the establishment of structured induction, coaching and mentoring programmes for all teachers and continuous capacity building for TSC agents and school administrators in the management of discipline function will be enhanced.

## 2.1.3.5 Resource mobilization and utilization

To mitigate on the challenge posed by inadequate budgetary resources, the strategic plan should be flexible enough to absorb the effects of financial austerity measures and other dynamic issues that may affect implementation. This may include institutionalization of a robust and effective risk mitigation plan.

## 2.2 Environmental Scan

Environmental scan is critical in understanding the Commission operation environment as it plays a big role in effective implementation of its programmes. The environmental scan has been carried out using SWOT, PESTEL and Stakeholder Analysis.

## 2.2.1 Strengths, Weaknesses, Opportunities and Threats (SWOT) Analysis

This is a framework for identifying and analyzing the internal and external factors that may impact the implementation of the 2019-2023 Strategic Plan. The successful implementation of the Plan will depend on the Commission's ability to exploit established success factors and embracing available and emerging opportunities for improvement.

1	STRENGTHS	2	WEAKNESSES
	• Existence of a clear legal and		<ul> <li>Lack of harmonized system for</li> </ul>
	institutional framework.		managing and sharing of data related
	• Structures for governance and effective		to the teaching resource.

### 2.2.3 Stakeholder Analysis

The Commission has a diverse range of stakeholders most of them being in the education sector. Among them are learners who are the beneficiaries of education and teachers as key drivers in delivery of quality education. Other stakeholders are institutions whose mandates have implications on the teaching service and development partners. Table 2.5 presents an analysis of the principal stakeholders, their roles and interests in the functions of the Teachers Service Commission and a summary of expectations from these stakeholders.

Table	2.5:	Stake	holder	rana	lvsis
IUDIC	<b>1</b> .0.	Dunc	nonuci	unu	iy 515

No.	Stakeholder	Stakeholder Expectation from TSC	TSC Expectation from Stakeholder
1. #### **CHAPTER THREE: STRATEGIC MODEL**

#### 3.0 Overview

This chapter outlines the strategic direction and focus of the Commission in the next five years. The Strategic Plan provides for an accelerated and effective implementation of TSC reform agenda which is informed by the global, regional and national contexts in the education sector.

### 3.1 Vision, Mission and Core values

### Vision

A transformative teaching service for quality education

#### **Mission**

To professionalize the teaching service for quality education and Development

#### **Core Values**

- **Professionalism:** All TSC staff shall observe requirements for professional conduct. The employees are expected to apply the skills, knowledge and competencies that meet the standards needed for the work assigned.
- **Customer Focus:** The Commission is committed to placing the customer first by upholding the philosophy of customer driven business management. Employees are expected to exhibit a high level of responsiveness to customer needs.
- Integrity: TSC staff members are expected to conduct themselves in a manner that demonstrates honesty, moral and ethical standards, and commitment to work.
- **Team spirit:** The TSC staff members are committed to working through crossstatus and cross functional teams. Staff members are equipped to handle work relationships; and share new information with colleagues.
- **Innovativeness:** Employees are encouraged to always explore, share and implement new ideas and approaches in service delivery.

### 3.2 STRATEGIC FOCUS AREAS

The TSC strategy is structured into three (3) broad Strategic Focus Areas addressing the Commission's mandate and intended reforms on the teaching service over the next five years. The Strategic Focus Areas include:

Strategic Focus Area 1: Teacher Competence, Conduct and Performance Management

This focus area seeks to ensure quality of the teacher at entry, effective support systems for teacher professional conduct and development during a teacher's career path. The strategy will focus on establishing a framework for regulation and enforcement of standards in the teaching service.

#### **Strategic Focus Area 2: Reforms and Innovations in provision of teaching services**

The expected result under this SFA is optimal utilization of the teaching resource and the deepening of efficiency measures in provision of teaching services at all levels. The reforms identified in this Strategic Plan will address various approaches in curriculum implementation while guaranteeing equity and inclusivity in the management of the teacher resource. The Commission will also explore and adopt appropriate alternative modes of curriculum implementation.

In order to enhance professionalism and integrity among employees, preventive strategies that forestall indiscipline will be put in place. These will include mentoring and coaching programmes for all employees.

### **Strategic Focus Area 3: Service Delivery Re-engineering**

This focus area seeks to strengthen the integrated support systems and structures to improve efficiency and effectiveness in service delivery at the Commission. It is aimed at enhancing responsiveness to customer and stakeholder concerns by TSC employees at all levels. Under this focus area, the Commission will review its processes and systems and strengthen its capacity development and utilization.

**Table 3.1** provides a summary of objectives and strategies to be implemented along the 3 Strategic Focus Areas during the 2019-2023 Plan period.

#### Table 3.1: Proposed strategic objectives and strategies

	within the teaching service

# **CHAPTER FOUR**

### **IMPLEMENTATION AND COORDINATION FRAMEWORK**

### 4.0 Overview

This chapter provides for the implementation and coordination framework for the Strategic Plan for 2019-2023. This includes the organizational structure, human and financial resource planning necessary for implementation. The Plan will inform the budgeting and procurement planning of the Commission at the beginning of each Financial Year.

# 4.1 Organizational Structure

The TSC organizational structure has been redesigned to support the execution of its mandate and ensure the successful implementation of this Strategic Plan. The structure is expected to facilitate assignment and delegation of duties, improve operations and ensure effective communication at all levels (See figure 1).

# 4.1.1 The Commission

The Commission consists of a Chairperson and eight members appointed in accordance with the Constitution. In addition, the Commission has established Committees under five thematic areas namely; Strategy and Innovation, Finance, Field Services, Audit and Human Resource Committees.

# 4.1.2 The Commission Secretary

The Commission Secretary is responsible for the day-to-day running of the Commission. The overriding role of the Commission Secretary is to ensure the Commission mandate under the Constitution and Statute law is executed effectively and efficiently. S/He is the Chief Executive, head of secretariat, the accounting and authorizing officer and a link between the Commissioners and the secretariat.

# 4.1.3 Directorates, Divisions and Sections

Currently, the Commission's services are delivered and managed under three Departments, namely, Teacher Management; Human Resource and Development; and Finance and Administration. The Departments in turn consist of nine (9) Directorates. The Directorates include; Administrative Services; Human Resource Management and Development; Finance and Accounts; Staffing; Field Services; Quality Assurance and Standards; Internal Audit; ICT and Legal Services. Each Directorate comprises Divisions, Sections and specialized Units. The Commission has also decentralized its functions through offices headed by Regional Coordinators, County Directors, Sub-county Directors and Curriculum Support Officers.

# 4.2 Staff Establishment and Human Resource Development Strategies

# 4.2.1 Staff Establishment

The current staff establishment of the Commission is 2,468 but only 1,721 are inpost, as summarized in Table 4.1. This implies a staff shortage of 747 which has adversely impacted on effective delivery of services. The significant shortage is mainly on operational and technical staff required at the County and sub-county levels. This gap will be addressed through appropriate Human resource management and development strategies outlined in this plan.

DESIGNATION	ESTABLISHMENT	IN-POST	VARIANCE
Heads of Directorate	9	8	(1)
Senior Management	73	26	(47)
Middle Level Managers	502	265	(237)
Operational Managers /Supervisory Staff	1884	1422	(462)
TOTAL	2468	1721	(747)

### Table 4.1: Staff Establishment

### SOURCE: HRM&D as at December 2018:

The Commission is presently conducting interviews to fill some of the declared vacancies  ${\bf Kev}$ 

- i. Heads of Directorate include Directors at Job Group S
- *ii. Senior Management comprises Senior Deputy Directors: Heads of Division, Regional Coordinators and County Directors at Job Group R.*
- *iii. Middle Level Managers comprises Heads of Section (Deputy Directors), County Directors and Deputy County Directors mostly at Job Group Q; Deputy Heads of Section (Assistant Deputy Director and Sub County Directors mostly at Job Group P.*
- *iv.* Operational or Supervisory Managers comprise of technical and professional staff at Job Groups N, M, L and K.

### 4.2.2 Human Resource Management Development strategies

The Commission will institute appropriate measures to mitigate staff shortages which include; regular skills audit to determine long term human resource needs; recognition and rewarding officers for exemplary performance; job enrichment and enlargement; continuous talent identification and development; continuous training and capacity building for staff; coaching and mentorship programmes for new employees and other staff retention incentives. In addition, the Commission, in liaison with the National Treasury, will continue recruitment of staff in strategic areas to fill gaps occasioned by natural attrition.

# 4.3 Financial resources

The Commission receives allocations on both recurrent and development funds from the National treasury. Tables 4.2(a), 4.2 (b) and 4.3 summarize resource requirements for each Strategic Focus Area, the estimated cost of recruiting additional teachers in the next five years and the projected resource gaps respectively.

# 4.3.1 Financial resources requirements

The Commission will require approximately Kshs.114.5 Billion to implement the plan in the next five years. Table 4.2 (a) provides a summary of resource requirements on both recurrent and development provisions.

STRATEGIC FOCUS AREA	Resou	rce require	ments				
	Baseline Estimates (Kshs.Mn)	Proje	ected Estima	tes (Kshs.M	/In)		
		2019/20	2020/21	2021/22	2022/23	2023/24	TOTALS
Teacher Competence, Conduct and Performance Management	31	5,660	3,625	3,950	3,999	3,944	21,180
Reforms and Innovations In Provision of Teaching Service	5300	21,810	21,725	21,715	13,382	13,423	92,057
Service Delivery Re-engineering	662	498	219	175	160	152	1,203
TOTAL	5993	27,968	25,569	25,841	17,541	17,520	114,439

# Table 4.2 (a): Strategic Plan resource requirements

# Table 4.2(b): Estimated cost of recruitment of additional teachers

ITEM	2019/20	2020/21	2021/22	2022/23	2023/24
100% Transition	8.3B	8.3B	8.3B	8.3B	-

Shortage cover up	8.1B	8.1B	8.1B	8.1B	8.1B
TOTAL	16.4B	16.4B	16.4B	16.4B	8.1B

#### 4.3.2 **Resource gaps**

As indicated in Table 4.2(b), the Commission will require Ksh 16.4 billion to recruit additional teachers each year, over the next four years and Ksh 8.1 billion in the fifth year. This sums to Ksh. 73.7 billion for the five years. In addition, Ksh 2.8 billion over and above the existing allocations under the MTEF will be required on both recurrent and development provisions in the next 5 years. This translates to a projected resource gap of Ksh. 76.5 billion for the successful implementation of the 2019-2023 Strategic Plan.

**Table 4.3: Resource gaps (Excluding Personnel Emoluments)** 

<b>RESOURCE GAI</b>	PS				
Expenditure	Requirement	t Estimates	(Ksh Mn) (	Allocation	Variance
	As per			(Ksh.Mn)	(Ksh. Mn)
	2019/20	2020/21	2021/22	2022/23	
Recurrent	1,598	931	1,288	1,881	(1,936)
Development	960	960	960	2,015	(865)
Total	2,558	1,891	2,248	3,896	(2,801)

#### **Mobilization Strategies** 4.3.3

The Implementation of the strategic objectives envisioned in the 2019-2023 Strategic Plan is expected to cost the Commission Kshs.114.5 billion. The Government of Kenya will provide the bulk of funding for the programmes in the plan. Over the last five years, the Commission received significant financial and technical support from its developmental partners. In order to supplement the budget, the Commission will continue engaging these partners to provide the necessary support to meet the plan objectives. It will also evaluate potential areas of collaboration to forge Public Private Partnership approaches to programme implementation.

Specific strategies to be pursued by the Commission will include but not limited to:

- i. Strengthening the implementation of the policy on resource mobilization and Public-Private Partnerships.
- ii. Developing Proposals for funding by identified development partners.
- iii. Collaborating with National and County Governments.

### 4.3.4 Risk Analysis and mitigation measures

The Commission has rolled out an Institutional Risk Management Framework and Policy to help in identification and management of strategic risks. The framework is aimed at strengthening risk management processes in the Commission. On the other hand, the policy requires all process owners to embrace proactive risk management initiatives to reinforce realization of set objectives in service delivery.

In this regard, all proposals on policy, programs and projects in the Commission will be subjected to risk assessment at every stage and mitigation efforts against risks properly identified and documented for implementation. Table 4.4 categorizes the strategic risks and proposed mitigation measures

S/NO	Risk	Category	Mitigation Measure
		(High(H) Medium(M) Low(L)	
1.	Budgetary constraints	H	<ul> <li>Intensify and diversify resource mobilization</li> <li>Prudent financial management and prioritization</li> </ul>
2.	Change in Government Policy and priorities	М	<ul> <li>Lobbying for resource ring-fencing</li> <li>Proactivity in addressing emerging issues through review of internal regulations and procedures</li> </ul>
3.	Stakeholder interests	Н	Strengthen Stakeholder engagement
4.	Negative attitude and perception	М	Design and implement appropriate communication strategy
5.	High staff turnover	М	<ul> <li>Lobby for more attractive packages/benefits</li> <li>Improve terms and conditions of service</li> <li>Introduce non-monetary incentives</li> <li>Develop and implement succession Management plans</li> </ul>
6.	Disruption of teaching services due to insecurity	М	<ul> <li>Engagement with relevant government agencies.</li> <li>Strengthen disaster preparedness and management mechanisms</li> </ul>

### **Table 4.4: Risk Analysis and Mitigation Measures**

# **CHAPTER FIVE: MONITORING, EVALUATION AND REPORTING**

# 5.0 Overview

This chapter outlines the process of monitoring, evaluation and reporting requirements of the plan.

# 5.1 Institutional framework and frequency of monitoring and reporting

The Commission monitors its programmes on a continuous basis guided by the TSC Monitoring and Evaluation Hand Book and other guidelines issued by the Public Service Performance Management Unit from time to time. The monitoring process will help to track input deliveries, outputs and also to record the key performance indicators. This is to identify deviations during implementation of the plan period and take a corrective action. Heads of Directorates and other process owners are expected to report on progress on delivery of set objectives on a quarterly basis. The reports will be presented for analysis and input at various management review meetings.

Consolidated Quarterly reports on the overall performance of the Commission will then be prepared and shared with the relevant Committees of the Commission and the Board.

# 5.2 **Responsibility for Monitoring**

# 1. Departmental Monitoring and Evaluation Committee (DMEC)

The DMEC of the Commission in conjunction' with the Policy, Planning, Research and Innovations (PPRI) Section will be responsible for overall performance monitoring of this Strategic Plan. This will focus on tracking the outcomes envisaged in the Plan and other emerging national policy and strategy documents. The DMEC will provide general guidance to ensure intervention programmes remain on track.

# 2. The Policy, Planning, Research and Innovations Section

The PPRI Section will be responsible for:

- i. Guiding the implementation of the strategic plan
- ii. Validating periodic reports submitted by various process owners
- iii. Conducting internal evaluation on achievement of set targets
- iv. Preparation and submission of evaluation reports to the management for corrective measures where appropriate.

# 3. TSC County Directors

The TSC County Directors in conjunction with the PPRI Section will coordinate monitoring of activities at the county and school level.

# 5.3 Mid-term and end-year Evaluation and Review of the Plan

Evaluation of the Commission's programmes is carried out at mid- year and end year in accordance with Public Service Performance Monitoring Unit (PSPMU) guidelines. Annual reviews will be organized to assess the extent to which Medium-Term objectives have been achieved during the plan period. Ad-hoc evaluation shall also be provided for on specific objectives and strategies in the Plan as and when need arises.

# 5.5 Review of the strategic plan

An in-depth mid-term evaluation of this Strategic Plan shall be conducted during the 2021-2022 financial year for purposes of realigning the plan with emerging issues during the implementation. The feedback from the midterm evaluation will inform the development of subsequent strategic plan at the end of Plan period. Annex 2: provides the detailed monitoring and evaluation for the 2019-2023 TSC strategic plan
